6th January 2026

Eco Day- 16th January 2026

Dear Parents/ Carers,

This year the school has continued to work hard to be more sustainable and eco-friendly. On **Friday 16th January 2026** we will be having an 'Eco Day' to embed and introduce children to opportunities that will be available to them as part of our school sustainability plan.

There will be a whole school assembly on this day which will encourage children to think about ways we can continue to be more environmentally friendly in school. Children will also be given the opportunity to think about joining school projects on climate change and sustainability.

Children will take part in various activities related to sustainability during the school day and are invited to come to school dressed up as anything related to the environment, nature or sustainability. Ideas for costumes could include animals, plants or logos. If your child does not wish to dress up, then they will need to come to school in their school uniform as normal. Please ensure sensible footwear is worn (no open toed shoes or shoes without backs to them).

Kind regards,

Mrs T. Clark
