Arc Pathway - Reception

Dear parents/carers,

In Reception, we use a program called Arc Pathway to assess, track and document children's learning. Arc Pathway is an online assessment system that enables practitioners to evidence children's attainment and progress over time.

We are now delighted to announce that this program is available for free download on iOS (Apple) and the Google Play Store (Android) to all parents who have children in Reception. Arc Pathway's easy to use software helps parents to better understand, develop and enhance their child's learning and development.

With the Arc Pathway app, you will be able to:

- **View your child's photo gallery** and **add your own special moments from home**. You also have the ability to like and comment on photos uploaded from your child's setting.
- **View Arc profiles** carried out by your child's early years setting (if they have been exported by your child's setting). If these are not available for you to view they will be shared at your child's parent evening.
- **View pathways and next steps** based on completed Arc profiles.

Within the next 4-5 days, you should receive an email containing log in details for this app. If for any reason you do not receive this, please let me know.

I am sure you will agree that working together will bring about positive results for your child and I am excited to see all the learning and development your child has been doing at home with you too!

Yours sincerely,

Miss Underdown
Assistant Headteacher
